

## **Census 2010 Notice**

US Census Bureau workers will begin working throughout the township to conduct the address canvassing operation in preparation of the 2010 Census. Census workers will canvass every block in the township to ensure that they have accounted for all addresses for the mail out of the Census Questionnaires in March 2010. The canvassing will begin in April and will last through the end of June 2009. Census Takers may knock on your doors to verify house numbers, the number of units and the unit designations at an address. They will not be asking for any personal information about any individual and are required to show proper official identification. Any address information collected will always remain safe and the information can never be used to deport any individual or evict or serve housing code violations. Feel free to contact the Clerks Office for additional information.
